- origin/master [base ndarray pex_exceptions psfex utils]

Branch origin/u/jbosch/HSC-1056

Found in:

- pex_exceptions

pex_exceptions

```
commit 9bc6a5e3bf90f20a8e67a4981edb44f1fcdac7a3
Author: Jim Bosch
Date:   Sun Oct 26 10:19:02 2014 +0900

    Add TypeError exception

    On the LSST side this appeared when the rest of the exceptions were rename
d (I
    think it may have been moved from another package).  While we're not renam
ing
    everything yet on the HSC side, we do need this exception for some afw::ta
ble
    features I'm moving over now.
```

```
commit c15c110e3e05a0184d618afa8dc2b621f628106b
Author: Bob Armstrong
Date:   Fri Aug 8 15:56:16 2014 -0400

    Keep track of which objects are used in psf determination.

    To do this I removed one iteration of psf_clean into the psf_make routine
    so all objects used will be properly accounted for.
```

```
commit bbd0ee4bfc5f93c4654bb36c796a18ed897cc32a
Author: Paul Price
Date:   Fri Aug 1 01:37:48 2014 +0900

    fix use of clapack

    There were a bunch of warnings about mismatched argument types.
    Most were using int* instead of integer* (which is long int*),
    but one was using double** instead of doublereal* (which is double*)
    which probably caused segfaults in some cases.
```
